

5 simple steps to maintain your aircscreen...

airscreen 1000 FILTER COMPONENTS

- (a) Media pads
- (b) Center screen
- (c) Panel
- (d) Pop-up corner
- (e) Powerhead

Remove the filter from the designated slot and **Disconnect** the power supply before servicing.

Place the filter on a flat surface. Open all 4 pop-up corners and remove used media pads.

Place new media pads on either side of the center screen (see fig. b) inside the filter

Make sure media is not sandwiched between the two panels (see fig. c), then close all 4 pop-up corner

Reconnect the power and place the filter back into the designated slot.
