

AHEPA Model

Product Features for AHEPA Model

- Activated carbon pre-filter removes odors
- Certified true HEPA (High-Efficiency Particulate Air) filter is 99.97% efficient at removing particles down to 0.3 micron
- Carbon VOC (Volatile Organic Compound) after-filter (included with Model AHEPA 550-3)
- Easy-to-change filters
- Powerful motor delivers between 245-560 CFM of filtered air
- Plug-in power cord
- Versatile installation: free-standing, ceiling-mounted, or wall-mounted
- Heavy-gauge steel cabinet with powder-paint finish

Product Features for ADMHEPA Model

- Certified true HEPA (High-Efficiency Particulate Air) filter
- MERV 11 pre-filter removes particles before they enter HEPA filter
- Activated carbon pre-filter removes odors
- 99.97% HEPA media filter removes particles down to 0.3 micron
- Powerful motor delivers 320 CFM of air without adding static pressure to HVAC system
- Plug-in power cord
- Versatile installation: free-standing, duct-mounted, or collar-mounted
- Heavy-gauge steel cabinet with powder-paint finish
- Corrosion-resistant cabinet provides rigid installation and durability

ADMHEPA Model

| AHEPA650 | 18" | 18" | 30½" |
| ADMHEPA400 | 20⅝" | 16¼" | 12¾" |

How It Works

Millions of airborne particulates and gases travel through the heating/cooling system 4-5 times every hour. The HEPA air cleaner connects to the return air duct and diverts $\frac{1}{3}$ to $\frac{1}{2}$ of this dirty air through a tightly sealed three-stage filtration system. A home can reach as many as 67 whole-house air changes per day, depending on the house size and model chosen. When an Amana® brand high-efficiency air cleaner is added to the return air, the home can achieve 96-120 whole-house air changes per day (with system fan on continuously).

No other HEPA air cleaner, Turbulent Flow Precipitator (TFP) or HEPA Energy/Heat Recovery Ventilator combination can clean a home with the power and efficiency of an Amana® brand Whole-House HEPA air-cleaning system.
